

HML Checker - Feature #137

Feature # 131 (New): Category Manipulation

New Child Category

11/12/2019 09:32 AM - Lane Shaw

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:	Lane Shaw	% Done:	0%
Category:	General UI	Estimated time:	0.00 hour
Target version:	v0.4.0		
Description Button/link that sits on the left of every category to create a new child category below all of the current child categories of the associated parent category. Don't forget to add to the undo buffer. (May also just be a plus sign button)
