| **Target version:** | v0.5.0 | | |

**Description**

Add a button at the bottom of the table labeled "Reviewed" which marks the product as reviewed, and moves to the next product on the right, if available.

If the product is already marked as reviewed the button will show "Unreview" instead in a different color, and when clicked will unmark the product as reviewed.

**Note**: Having auto-review enabled will set it reviewed again when moving to the next product.
